Fullstack Developer

Introduction

Amaris is an independent, international Technologies and Management Consulting Group. Created in 2007, Amaris is already established in over 50 countries and supports 500 clients worldwide throughout their projects' lifecycle. Our expertise covers 5 areas of innovation: Business and Management, IT/IS, Telecom, Engineering and High Technologies, Biotech and Pharma. With 65 offices across the World, the Group offers proximity support to its clients in all their locations and many opportunities of international careers for employees.

In 2017, Amaris aim to reach a turnover of 180 million euros, 3500 employees and the ability to recruit one new employee every 5 hours. We expect to triple our workforce within the next years and reach an international leader position in independent consulting.

Job Description

Working with all the latest technologies, Amaris' IT department is a dynamic and driving force for the Group. It reflects the group values through its expertise and international organization. Due to our growing need for company expansion, that will enhance our productivity, we are looking for a new **Fullstack Developer** that will be working for our Development team. You will coordinate with a global, young and innovative team and work within an agile environment.
As a **Fullstack Developer**, your responsibilities include (but are not limited to):

- Fullstack development in an environment where the team works on new development as well as some maintenance on existing products.
- You will be creating and extending software components that integrate mostly into our web applications.
- Build our Information System used by almost a thousand of employees around the world, crossing different domains as HR, Finance, Business, and all other corporate functions.
- Design the project using appropriate technologies and framework (Ajax, JQuery, .Net, JavaScript…) to be efficient while giving the best UI.

Ideal candidate

- Graduated from engineering school in Computer Science or related technical discipline (or equivalent) you are looking for a career in an international environment.
- You have around 2-to-7-year programming experience in OOP (C# / ASP.NET MVC preferred).

amaris | inspiring change

- A solid foundation in computer science, with strong competencies in data structures, algorithms, and software design.
- Excellent working knowledge of web technologies, with a background of building websites
- An organized and rigorous person, with a certain taste for quality in work with business vision.
- Proactive, eager to learn, young and dynamic, you want to blossom contributing to a company in full expansion.
- Be passionate by development or highly motivated to improve your development skill.
- Good level of English in order to attend meetings with other development teams in Europe, give support to your applications, help project managers and architects take the best decision, document your work.

Technologies Required

- C# & ASP.Net MVC
- Unit Test (Nunit/MSTest)
- RESTFull Web API
- Entity Framework 6
- Bootstrap 3
- Javascript
- HTML5, CSS3

Benefits

- 13th month salary
- 14+ annual leaves per year
- Private healthcare insurance, starting from your probation period
- Yearly performance appraisal
- Company trip abroad
- Teambuilding activities: Team lunch / dinner, football matches / other successes celebrations
- Our working environment:
- Start an actual career, evolutions are very frequent in Amaris thanks to the fact that we are a young & fast-growing company.
- Flexible time: early bird? Night owl? We just adapt to you!
- Work with teams across continents everyday: Europe, Asia, Africa…(we have 75+ nationalities in 2016), improve your English level
