# JOB DESCRIPTION

Job title: .NET SOFTWARE

Department: Software Development

## DUTIES & RESPONSIBILITIES

- » Develop new and supporting existing enterprise .NET systems that offer large-scale and distributed implementations to a dynamic user base.
- » Contribute to the system implementation efforts at various layers.
- » Be responsible for **the security, performance, reliability, stability and high-availability of the systems.**

## SKILLS & QUALIFICATIONS

- » Comprehensive experience and practical knowledge of web development with .NET technologies: **ASP.NET MVC (C#), and MSSQL.**
- » Hands-on experience **Javascript, HTML and CSS.**
- » A passionate interest in new technologies.

## Nice to have, if you DON'T, you will have just after one year working here:

- » Deep understanding of **S.O.L.I.D principles** and know how to write Clean Code.
- » Practical knowledge of **Unit Test and TDD.**
- » Extensive experience with **Angular2 + TypeScript, or ReactJs + Redux.**
- » **600+** points of TOEIC.

## WHY YOU WILL LOVE WORKING HERE

- » Work in a dynamic environment alongside with team members who are talented and passionate about what they do.
- » Attractive salary: up to **\$1000**, annual rise and plus **13th & 14th month salary.**
- » High bonus and incentive based on **performance, seniority.**
- » Long-term service award.
- » Quarterly and yearly incentive award for best-performing employees.
- » Outstanding annual company trip.
- » Team building events are fully sponsored by company.

- » Annual health check and (PVI) health insurance.
- » Complimentary duty meals, snack & beverage.
- » In-house health club: **gym, swimming pool, soccer field, volleyball court, and entertainment area.**

**You should NOT apply if you:**

- » Not looking for a long-term engagement.
- » Not having passion about researching new technologies.
