DXC Early Career Professional (DECP) Program Job Description

Overview:

How would you like to join an international software development center in Vietnam to learn, to grow personally as well as professionally, and to gain valuable experience in a fast-paced development environment?

We believe every graduate is unique and our aim is to help you build a solid foundation in your professional career, apply your learnings, and discover new possibilities.

If you are passionate about making a difference for our customers and society, this program is for you! Whether you are a tech enthusiast or someone who just wants to make an impact on people's lives – join the DXC journey in shaping the future of tomorrow.

What you will typically do in an DECP Program:

- Fully participate in training sessions on various IT topics, including programming languages, operating systems, networking fundamentals, and soft skills.
- Apply classroom learning to real-world projects under the guidance of experienced mentors.
- Assist Mentor/ Senior IT professionals/ Project Manager with assigned tasks.
- Demonstrate a willingness to learn and adapt in a fast-paced environment.
- Comply with DECP Program and Company Regulation.
- Stay up-to-date on the latest IT trends and technologies.

Qualifications:

- Diploma's or Bachelor's degree (or global equivalent) required
- Degree program in computer science, management information systems, or related field preferred
- Zero or more years of technology-related work experience
- Has knowledge or relevant work experience in any of the following programming languages or technologies: Java/Java EE, .NET, C#, C++, C, JavaScript, SQL, System, Linux, window server, ...

- Good English communication skills, from Upper level
- Good Japanese communication skills, equivalent to N3 and above.
